

Boardic Collar

Pallet collars are a common method of transporting and storing goods. They are also environmentally friendly and have a long service life. Our pallet collars are produced from Swedish spruce and are approved by the Swedish Board of Agriculture. The pallet collars can be folded and packaged up when not in use. The sides of the pallet collar are made from 20x200 mm planed wood and the hinges from galvanised plate. Approved to ISPM15 for export.
