

Boardic Pine Plywood BB/BB

We stock pine plywood, exterior glued E1 (WBP). The following sizes are available from stock. Of course we can also cut boards to size to meet your requirements.

OUR STANDARD SIZES

- 2440x1220x4 mm
- 2440x1220x6 mm
- 2440x1220x9 mm
- 2440x1220x12 mm

EXPLANATIONS

Surface quality

BB = Lots of small knots and knot holes max. 20mm.
Fitted with plugs and filled.

X = Reverse side veneer. Knots, knot holes, cracks and joints are permitted. Heartwood may occur.

Pine plywood is also available with decorative striations in the surface veneer, and is then known as striated plywood. The striations are 100 mm c/c and have bevelled edges. Edges on the long sides of the board are rebated.

Gluing

WBP = Dark glue line, water boil proof.

We can cut most boards and sizes on our saw lines.
